

The Convention on the Physical Protection of Nuclear Material

THE STATES PARTIES TO THIS CONVENTION,

RECOGNIZING the right of all States to develop and apply nuclear energy for peaceful purposes and their legitimate interests in the potential benefits to be derived from the peaceful application of nuclear energy,

CONVINCED of the need for facilitating international co-operation in the peaceful application of nuclear energy,

DESIRING to avert the potential dangers posed by the unlawful taking and use of nuclear material,

CONVINCED that offences relating to nuclear material are a matter of grave concern and that there is an urgent need to adopt appropriate and effective measures to ensure the prevention, detection and punishment of such offences,

AWARE OF THE NEED FOR international co-operation to establish, in conformity with the national law of each State Party and with this Convention, effective measures for the physical protection of nuclear material,

CONVINCED that this Convention should facilitate the safe transfer of nuclear material,

STRESSING also the importance of the physical protection of nuclear material in domestic use, storage and transport,

RECOGNIZING the importance of effective physical protection of nuclear material used for military purposes, and understanding that such material is and will continue to be accorded stringent physical protection,

HAVE AGREED as follows:

Article 1

For the purposes of this Convention:

1. "nuclear material" means plutonium except that with isotopic concentration exceeding 80% in plutonium-238; uranium-233; uranium enriched in the isotope 235 or 233; uranium containing the mixture of isotopes as occurring in nature other than in the form of ore or ore-residue; any material containing one or more of the foregoing;

2. "uranium enriched in the isotope 235 or 233" means uranium containing the isotope 235 or 233 or both in an amount such that the abundance ratio of the sum of these

isotopes to the isotope 238 is greater than the ratio of the isotope 235 to the isotope 238 occurring in nature;

3. "international nuclear transport" means the carriage of a consignment of nuclear material by any means of transportation intended to go beyond the territory of the State where the shipment originates beginning with the departure from a facility of the shipper in that State and ending with the arrival at a facility of the receiver within the State of ultimate destination.

Article 2

1. This Convention shall apply to nuclear material used for peaceful purposes while in international nuclear transport.

2. With the exception of articles 3 and 4 and paragraph 3 of article 5, this Convention shall also apply to nuclear material used for peaceful purposes while in domestic use, storage and transport.

3. Apart from the commitments expressly undertaken by States Parties in the articles covered by paragraph 2 with respect to nuclear material used for peaceful purposes while in domestic use, storage and transport, nothing in this Convention shall be interpreted as affecting the sovereign rights of a State regarding the domestic use, storage and transport of such nuclear material.

Article 3

Each State Party shall take appropriate steps within the framework of its national law and consistent with international law to ensure as far as practicable that, during international nuclear transport, nuclear material within its territory, or on board a ship or aircraft under its jurisdiction insofar as such ship or aircraft is engaged in the transport to or from that State, is protected at the levels described in Annex I.

Article 4

1. Each State Party shall not export or authorize the export of nuclear material unless the State Party has received assurances that such material will be protected during the international nuclear transport at the levels described in Annex I.

2. Each State Party shall not import or authorize the import of nuclear material from a State not party to this Convention unless the State Party has received assurances that such material will during the international nuclear transport be protected at the levels described in Annex I.

3. A State Party shall not allow the transit of its territory by land or internal waterways or through its airports or seaports of nuclear material between States that are not parties to this Convention unless the State Party has received assurances as far as practicable that

this nuclear material will be protected during international nuclear transport at the levels described in Annex I.

4. Each State Party shall apply within the framework of its national law the levels of physical protection described in Annex I to nuclear material being transported from a part of that State to another part of the same State through international waters or airspace.

5. The State Party responsible for receiving assurances that the nuclear material will be protected at the levels described in Annex I according to paragraphs 1 to 3 shall identify and inform in advance States which the nuclear material is expected to transit by land or internal waterways, or whose airports or seaports it is expected to enter.

6. The responsibility for obtaining assurances referred to in paragraph 1 may be transferred, by mutual agreement, to the State Party involved in the transport as the importing State.

7. Nothing in this article shall be interpreted as in any way affecting the territorial sovereignty and jurisdiction of a State, including that over its airspace and territorial sea.

Article 5

1. States Parties shall identify and make known to each other directly or through the International Atomic Energy Agency their central authority and point of contact having responsibility for physical protection of nuclear material and for co-ordinating recovery and response operations in the event of any unauthorized removal, use or alteration of nuclear material or in the event of credible threat thereof.

2. In the case of theft, robbery or any other unlawful taking of nuclear material or of credible threat thereof, States Parties shall, in accordance with their national law, provide co-operation and assistance to the maximum feasible extent in the recovery and protection of such material to any State that so requests. In particular:

1. a State Party shall take appropriate steps to inform as soon as possible other States, which appear to it to be concerned, of any theft, robbery or other unlawful taking of nuclear material or credible threat thereof and to inform, where appropriate, international organizations;

2. as appropriate, the States Parties concerned shall exchange information with each other or international organizations with a view to protecting threatened nuclear material, verifying the integrity of the shipping container, or recovering unlawfully taken nuclear material and shall:

1. co-ordinate their efforts through diplomatic and other agreed channels;

2. render assistance; if requested;

3. ensure the return of nuclear material stolen or missing as a consequence of the above-mentioned events.

The means of implementation of this co-operation shall be determined by the States Parties concerned.

3. States Parties shall co-operate and consult as appropriate, with each other directly or through international organizations, with a view to obtaining guidance on the design, maintenance and improvement of systems of physical protection of nuclear material in international transport.

Article 6

1. States Parties shall take appropriate measures consistent with their national law to protect the confidentiality of any information which they receive in confidence by virtue of the provisions of this Convention from another State Party or through participation in an activity carried out for the implementation of this Convention. If States Parties provide information to international organizations in confidence, steps shall be taken to ensure that the confidentiality of such information is protected.

2. States Parties shall not be required by this Convention to provide any information which they are not permitted to communicate pursuant to national law or which would jeopardize the security of the State concerned or the physical protection of nuclear material.

Article 7

1. The intentional commission of:

1. an act without lawful authority which constitutes the receipt, possession, use, transfer, alteration, disposal or dispersal of nuclear material and which causes or is likely to cause death or serious injury to any person or substantial damage to property;

2. a theft or robbery of nuclear material;

3. an embezzlement or fraudulent obtaining of nuclear material;

4. an act constituting a demand for nuclear material by threat or use of force or by any other form of intimidation;

5. a threat:

1. to use nuclear material to cause death or serious injury to any person or substantial property damage, or

2. to commit an offence described in sub-paragraph (b) in order to compel a natural or legal person, international organization or State to do or to refrain from doing any act;

6. an attempt to commit any offence described in paragraphs (a), (b) or (c); and

7. an act which constitutes participation in any offence described in paragraphs (a) to (f)

shall be made a punishable offence by each State Party under its national law.

2. Each State Party shall make the offences described in this article punishable by appropriate penalties which take into account their grave nature.

Article 8

1. Each State Party shall take such measures as may be necessary to establish its jurisdiction over the offences set forth in article 7 in the following cases;

1. when the offence is committed in the territory of that State or on board a ship or aircraft registered in that State;

2. when the alleged offender is a national of that State.

2. Each State Party shall likewise take such measures as may be necessary to establish its jurisdiction over these offences in cases where the alleged offender is presented in its territory and it does not extradite him pursuant to article 11 to any of the States mentioned in paragraph 1.

3. This Convention does not exclude any criminal jurisdiction exercised in accordance with national law.

4. In addition to the States Parties mentioned in paragraphs 1 and 2, each State Party may, consistent with international law, establish its jurisdiction over the offences set forth in article 7 when it is involved in international nuclear transport as the exporting or importing State.

Article 9

Upon being satisfied that the circumstances so warrant, the State Party in whose territory the alleged offender is present shall take appropriate measures, including detention, under its national law to ensure his presence for the purpose of prosecution or extradition. Measures taken according to this article shall be notified without delay to the States required to establish jurisdiction pursuant to article 8 and, where appropriate, all other States concerned.

Article 10

The State Party in whose territory the alleged offender is present shall, if it does not extradite him, submit, without exception whatsoever and without undue delay, the case to its competent authorities for the purpose of prosecution, through proceedings in accordance with the laws of that State.

Article 11

1. The offences in article 7 shall be deemed to be included as extraditable offences in any extradition treaty existing between States Parties. States Parties undertake to include those offences as extraditable offences in every future extradition treaty to be concluded between them.

2. If a State Party which makes extradition conditional on the existence of a treaty receives a request for extradition from another State Party with which it has no extradition treaty, it may at its option consider this Convention as the legal basis for extradition in respect of those offences. Extradition shall be subject to the other conditions provided by the law of the requested State.

3. States Parties which do not make extradition conditional on the existence of a treaty shall recognize those offences as extraditable offences between themselves subject to the conditions provided by the law of the requested State.

4. Each of the offences shall be treated, for the purpose of extradition between States Parties, as if it had been committed not only in the place in which it occurred but also in the territories of the States Parties required to establish their jurisdiction in accordance with paragraph 1 of article 8.

Article 12

Any person regarding whom proceedings are being carried out in connection with any of the offences set forth in article 7 shall be guaranteed fair treatment at all stages of the proceedings.

Article 13

1. States Parties shall afford one another the greatest measure of assistance in connection with criminal proceedings brought in respect of the offences set forth in article 7, including the supply of evidence at their disposal necessary for the proceedings. The law of the State requested shall apply in all cases.

2. The provisions of paragraph 1 shall not affect obligations under any other treaty, bilateral or multilateral, which governs or will govern, in whole or in part, mutual assistance in criminal matters.

Article 14

1. Each State Party shall inform the depositary of its laws and regulations which give effect to this Convention. The depositary shall communicate such information periodically to all States Parties.

2. The State Party where an alleged offender is prosecuted shall, wherever practicable, first communicate the final outcome of the proceedings to the States directly concerned. The State Party shall also communicate the final outcome to the depositary who shall inform all States.

3. Where an offence involves nuclear material used for peaceful purposes in domestic use, storage or transport, and both the alleged offender and the nuclear material remain in the territory of the State Party in which the offence was committed, nothing in this Convention shall be interpreted as requiring that State Party to provide information concerning criminal proceedings arising out of such an offence.

Article 15

The Annexes constitute an integral part of this Convention.

Article 16

1. A conference of States Parties shall be convened by the depositary of five years after the entry into force of this Convention to review the implementation of the Convention and its adequacy as concerns the preamble, the whole of the operative part and the annexes in the light of the then prevailing situation.

2. At intervals of not less than five years thereafter, the majority of States Parties may obtain, by submitting a proposal to this effect to the depositary, the convening of further conferences with the same objective.

Article 17

1. In the event of a dispute between two or more States Parties concerning the interpretation or application of this Convention, such States Parties shall consult with a view to the settlement of the dispute by negotiation, or by any other peaceful means of settling disputes acceptable to all parties to the dispute.

2. Any dispute of this character which cannot be settled in the manner prescribed in paragraph 1 shall, at the request of any party to such dispute, be submitted to arbitration or referred to the International Court of Justice for decision. Where a dispute is submitted to arbitration, if, within six months from the date of the request, the parties to the dispute are unable to agree on the organization of the arbitration, a party may request the President of the International Court of Justice or the Secretary-General of the United

Nations to appoint one or more arbitrators. In case of conflicting requests by the parties to the dispute, the request to the Secretary-General of the United Nations shall have priority.

3. Each State Party may at the time of signature, ratification, acceptance or approval of this Convention or accession thereto declare that it does not consider itself bound by either or both of the dispute settlement procedures provided for in paragraph 2. The other States Parties shall not be bound by a dispute settlement procedure provided for in paragraph 2, with respect to a State Party which has made a reservation to that procedure.

4. Any State Party which has made a reservation in accordance with paragraph 3 may at any time withdraw that reservation by notification to the depositary.

Article 18

1. This Convention shall be open for signature by all States at the Headquarters of the International Atomic Energy Agency in Vienna and at the Headquarters of the United Nations in New York from 3 March 1980 until its entry into force.

2. This Convention is subject to ratification, acceptance or approval by the signatory States.

3. After its entry into force, this Convention will be open for accession by all States.

4.

1. This Convention shall be open for signature or accession by international organizations and regional organizations of an integration or other nature, provided that any such organization is constituted by sovereign States and has competence in respect of the negotiation, conclusion and application of international agreements in matters covered by this Convention.

2. In matters within their competence, such organizations shall, on their own behalf, exercise the rights and fulfil the responsibilities which this Convention attributes to States Parties.

3. When becoming party to this Convention such an organization shall communicate to the depositary a declaration indicating which States are members thereof and which articles of this Convention do not apply to it.

4. Such an organization shall not hold any vote additional to those of its Member States.

5. Instruments of ratification, acceptance, approval or accession shall be deposited with depositary.

Article 19

1. This Convention shall enter into force on the thirtieth day following the date of deposit of the twenty-first instrument of ratification, acceptance or approval with the depositary.

2. For each State ratifying, accepting, approving or acceding to the Convention after the date of deposit of the twenty-first instrument of ratification, acceptance or approval, the Convention shall enter into force on the thirtieth day after the deposit by such State of its instrument of ratification, acceptance, approval or accession.

Article 20

1. Without prejudice to article 16 a State Party may propose amendments to this Convention. The proposed amendment shall be submitted to the depositary who shall circulate it immediately to all States Parties. If a majority of States Parties request the depositary to convene a conference to consider the proposed amendments, the depositary shall invite all States Parties to attend such a conference to be held not sooner than thirty days after the invitations are issued. Any amendment adopted at the conference by a two-thirds majority of all States Parties shall be promptly circulated by the depositary to all States Parties.

2. The amendment shall enter into force for each State Party that deposits its instrument of ratification, acceptance or approval of the amendment on the thirtieth day after the date on which two thirds of the States Parties have deposited their instruments of ratification, acceptance or approval with the depositary. Thereafter, the amendment shall enter into force for any other State Party on the day on which that State Party deposits its instrument of ratification, acceptance or approval of the amendment.

Article 21

1. Any State Party may denounce this Convention by written notification to the depositary.

2. Denunciation shall take effect one hundred and eighty days following the date on which notification is received by the depositary.

Article 22

The depositary shall promptly notify all States of:

1. each signature of this Convention;
2. each deposit of an instrument of ratification, acceptance, approval or accession;
3. any reservation or withdrawal in accordance with article 17;

4. any communication made by an organization in accordance with paragraph 4(c) of article 18;

5. the entry into force of this Convention;

6. the entry into force of any amendment to this Convention; and

7. any denunciation made under article 21.

Article 23

The original of this Convention, of which the Arabic, Chinese, English, French, Russian and Spanish texts are equally authentic, shall be deposited with the Director General of the International Atomic Energy Agency who shall send certified copies thereof to all States.

IN WITNESS WHEREOF, the undersigned, being duly authorized, have signed this Convention, opened for signature at Vienna and at New York on 3 March 1980.

Annex I

Levels of Physical Protection to be Applied in International Transport of Nuclear Materials as Categorized in Annex II

1. Levels of physical protection for nuclear material during storage incidental to international nuclear transport include:

1. For Category III materials, storage within an area to which access is controlled;

2. For Category II materials, storage within an area under constant surveillance by guards or electronic devices, surrounded by a physical barrier with a limited number of points of entry under appropriate control or any area with an equivalent level of physical protection;

3. For Category I material, storage within a protected area as defined for Category II above, to which, in addition, access is restricted to persons whose trustworthiness has been determined, and which is under surveillance by guards who are in close communication with appropriate response forces. Specific measures taken in this context should have as their object the detection and prevention of any assault, unauthorized access or unauthorized removal of material.

2. Levels of physical protection for nuclear material during international transport include:

1. For Category II and III materials, transportation shall take place under special precautions including prior arrangements among sender, receiver, and carrier, and prior

agreement between natural or legal persons subject to the jurisdiction and regulation of exporting and importing States, specifying time, place and procedures for transferring transport responsibility;

2. For Category I materials, transportation shall take place under special precautions identified above for transportation of Category II and III materials, and in addition, under constant surveillance by escorts and under conditions which assure close communication with appropriate response forces;

3. For natural uranium other than in the form of ore or ore-residue; transportation protection for quantities exceeding 500 kilograms uranium shall include advance notification of shipment specifying mode of transport, expected time of arrival and confirmation of receipt of shipment.

Annex II

Table: Categorization of Nuclear Material

Material	Form	Category
I	II	IIIc/
1. Plutonium	a/	Unirradiatedb/
500 g	500 g or less	but more than 15 g
		2 kg or more
		Less than 2 kg but more than
2. Uranium-235		Unirradiatedb/

* uranium enriched to 20% ²³⁵U or more

* uranium enriched to 10% ²³⁵U but less than 20%

* uranium enriched above natural, but less than 10% ²³⁵U

5 kg or more

Less than 5 kg but more than 1 kg

10 kg or more

1 kg or less but more than 15 g

Less than 10 kg but more than 1 kg

10 kg or more

3. Uranium-233 Unirradiatedb/ 2 kg or more Less than 2 kg but more than
500 g 500 g or less but more than 15 g

4. Irradiated fuel

Depleted or natural uranium, thorium or low-enriched fuel (less than 10% fissionable content)d/e/

a/ All plutonium except that with isotopic concentration exceeding 80% in plutonium-238.

b/ Material not irradiated in a reactor or material irradiated in a reactor but with a radiation level equal to or less than 100 rads/hour at one metre unshielded.

c/ Quantities not falling in Category III and natural uranium should be protected in accordance with prudent management practice.

d/ Although this level of protection is recommended, it would be open to States, upon evaluation of the specific circumstances, to assign a different category of physical protection.

e/ Other fuel which by virtue of its original fissionable material content is classified as Category I and II before irradiation may be reduced one category level while the radiation level from the fuel exceeds 100 rads/hour at one metre unshielded.

Final Act

Meeting of Governmental Representatives to Consider the Drafting of a Convention on the Physical Protection of Nuclear Material

1. The Meeting of Governmental Representatives to Consider the Drafting of a Convention on the Physical Protection of Nuclear Material met in Vienna at the Headquarters of the International Atomic Energy Agency from 31 October to 10 November 1977, from 10 to 20 April 1978, from 5 to 16 February and from 15 to 26 October 1979. Informal consultations between Governmental Representatives took place from 4 to 7 September 1978 and from 24 to 25 September 1979.

2. Representatives of 58 States and one organization participated, namely, representatives of:

Algeria	Korea, Republic of
Argentina	Libyan Arab Jamahiriya
Australia	Luxembourg
Austria	Mexico
Belgium	Netherlands
Brazil	Niger
Bulgaria	Norway
Canada	Pakistan
Chile	Panama

Colombia Paraguay
Costa Rica Peru
Cuba Philippines
Czechoslovakia Poland
Denmark Qatar
Ecuador Romania
Egypt South Africa
Finland Spain
France Sweden
German Democratic Republic Switzerland
Germany, Federal Republic of Tunisia
Greece Turkey
Guatemala Union of Soviet Socialist Republics
Holy See United Arab Emirates
Hungary United Kingdom of Great Britain and Northern Ireland
India United States of America
Indonesia Venezuela
Ireland Yugoslavia
Israel Zaire
Italy European Atomic Energy Community
Japan

3. The following States and international organizations participated as observers:

Iran Lebanon Malaysia Thailand Nuclear Energy Agency of the Organisation for Economic Co-operation and Development

4. The Meeting elected Ambassador D.L. Siazon Jr. (Philippines) as Chairman. For the meetings in April 1978 and February 1979 Mr. R.A. Estrada-Oyuela (Argentina) was elected Chairman.

5. The Meetings elected as Vice-Chairmen:

Mr. K. Willuhn of the German Democratic Republic, who at the meeting in February 1979 was succeeded by Mr. H. Rabold of the German Democratic Republic;

Mr. R.J.S. Harry, Netherlands, who at the meeting of October 1979 was succeeded by Mr. G. Dahlhoff of the Federal Republic of Germany;

Mr. R.A. Estrada-Oyuela, Argentina, who at the meeting of October 1979 was succeeded by Mr. L.A. Olivieri of Argentina.

Mr. L.W. Herron (Australia) was elected Rapporteur. For the meeting in October 1979 Mr. N.R. Smith (Australia) was elected Rapporteur.

6. Secretariat services were provided by the International Atomic Energy Agency. The Director General of the Agency was represented by the Director of the Legal Division of the Agency, Mr. D.M. Edwards and, in succession to him, Mr. L.W. Herron.

7. The Meeting set up the following groups:

1. Working Group on Technical Issues

Chairman: Mr. R.J.S. Harry, Netherlands

2. Working Group on Legal Issues

Chairman: Mr. R.A. Estrada-Oyuela, Argentina

3. Working Group on Scope of Convention

Chairman: Mr. K. Willuhn, German Democratic Republic

4. Drafting Committee

Chairman: Mr. De Castro Neves, Brazil

Members: Representatives of Australia, Brazil, Canada, Chile, Czechoslovakia, Egypt, France, Federal Republic of Germany, Italy, Japan, Mexico, Qatar, Tunisia, Union of Soviet Socialist Republics, United States of America.

8. The Meeting had before it the following documents:

1. Draft Convention on the Physical Protection of Nuclear Materials, Facilities and Transports, as contained in document CPNM/1;

2. IAEA document INFCIRC/225/Rev.1: The Physical Protection of Nuclear Material;

3. IAEA document INFCIRC/254: Communications Received from Certain Member States regarding Guidelines for the Export of Nuclear Material, Equipment or Technology.

9. The Meeting completed consideration of a Convention, the text of which is attached as Annex II[*]. Certain delegations expressed reservations with regard to particular provisions in the text. These are recorded in the documents and in the Daily Reports of the Meeting. It was agreed that the text will be referred by delegations to their authorities for consideration.

10. The Meeting recommended that the text of the Convention be transmitted for information to the twenty-third General Conference of the International Atomic Energy Agency.

11. The Convention will, in accordance with its terms, be opened for signature from 3 March 1980 at the Headquarters of the International Atomic Energy Agency in Vienna and at the Headquarters of the United Nations in New York.

Vienna, 26 October 1979

(signed)

D.L. Siazon Jr.

[1] The text of the Convention was transmitted to the twenty-third (1979) regular session of the General Conference of the International Atomic Energy Agency, pursuant to paragraph 11 of the Final Act, as document INFCIRC/274.

[*] Since the Convention has been opened for signature it is not attached here as Annex I; it is reproduced as the first part of this document.
